Timothy,

I have added the minerals information to the executive summary.

Thanks,
Lee Kirk

Additional Potential Questions

Sorry about this, but this came from DOI late yesterday. You may have already addressed in your monument review, but if not can you look over these questions and address for the appropriate monuments under review.

Are there mines or processing facilities near or adjacent to a National Monument?

If it is a mine or mineral processing facility, they would like some information on:

1. the extent to which activities on the monument (pre and post designation) affected the facility;
2. the type of minerals processed;
3. the permitting entity;
4. and scale of activity.

Again sorry for these broad scale questions so quickly after the deadline, but as I mentioned on the phone there were a number of follow-up questions from the Utah NM Review, but most were specific to those monuments. Then we get some general questions and some they want more information on and others not.

My apologies for adding on to a heavy lift but if you can address in a **word document** and add to the folders I am much appreciative.
